FORMULAE & FAIRY TALES is an evening of virtuosic dance theatre set in overlapping worlds. It places the cold, high-stakes world of mathematics alongside a vivid, twisted fairy tale. Based on the life and work of WWII code-breaker & father of artificial intelligence Alan Turing, and his connection to Snow White, the show creates evocative scenes of sensuality, mathematical precision and comedy. The movement features smooth physicality intertwined with intimacy and virtuosity.

FORMULAE & FAIRY TALES is a proud recipient of the New England Foundation for the Arts' National Dance Project Production Grant, which provides funding for the creation and touring of the work. NDP subsidies are available to a limited number of tour presenters in 2019-2021.

Invertigo will continue to tour *FORMULAE & FAIRY TALES* during the 2020-21 season, kicking off with a performance at the University of Florida Performing Arts' Phillips Center on Wednesday, February 5, 2020
